

FIT

Very long-life, front terminal AGM battery

12 plus years very long design life, in flame retardant ABS cases.

The FIT AGM VRLA range is designed for the highest reliability and safety fields. These batteries are constructed with an easy-access front-terminal design and are particularly suited to telecom backup applications in 19” and 23” cabinets.

The construction of the FIT range is aimed to minimise the footprint thanks to good energy density and allows easy access during the routine visual inspections. Internally high-quality fiber-glass separators are used to control recombination currents and avoid thermal runaway.

The exterior construction uses a flame retardant ABS plastic to UL94 V0 that guarantees a high level of safety and superior thermal stability to avoid case bulging. The design has been optimized to lower self-discharge during storage.

Ideal for:
Industry
Transportation
Telecommunications

Features

- Long design life
- Flame retardant casing
- AGM Technology
- 99% Recyclable
- High Cyclic Batteries

Exclusive Australian FIAMM Partner
Power On Australia

Trusted battery solutions
for Utilities, Mining, Oil & Gas

- 🛡️ Batch integrity
- 🛡️ Supply control
- 🛡️ Compliance assured
- 🛡️ Performance validation
- 🛡️ Warranty & accountability
